Octane Obit — Introduction, Expectations & Commercials — Fahd Agro Investments Ltd

Oct 15, 2026

Octane Obit gives Fahd Agro Investments Ltd one trusted view of every litre, shilling and shift at its forecourt, starting with a software-only rollout and KRA eTIMS integration.

1. Introducing Octane Obit

Octane Obit, from Summit Surds Limited, is a forecourt management platform that turns every litre, shilling and shift at your station into a number you can trust, in real time. It follows fuel from delivery to tank, tank to pump, and sale to bank, and checks each step as it happens instead of at month-end.

For Fahd Agro Investments Ltd, this means:

- **Deliveries and tanks:** deliveries are verified against purchase orders, and tank levels are tracked so loss is flagged the moment it happens.
- **Pumps and attendants:** every sale is attributed to an attendant and a shift.
- **Payments:** cash, mobile money and card collections are reconciled against recorded sales, with a shift closing only once it balances.
- **KRA compliance:** every qualifying sale is submitted to KRA eTIMS as it happens, so the station is KRA-compliant by default. Government requires fuel stations to be automated, and Octane Obit is built for that requirement.
- **Management view:** reports and dashboards by shift, attendant, product and station.

2. Scope and what you can expect

This first phase is software only. Octane Obit will cover the forecourt workflow from shift to bank to KRA, and connect to pumps and dispensers as a second phase once your new dispensers are in place.

Area	What Octane Obit delivers
Fuel sales	Capture and reporting of fuel sales by product and shift
Attendant accountability	Every transaction attributed to an individual attendant
Shift management	Sales recorded, monitored and reconciled by shift
Payment reconciliation	Cash, mobile-money and card collections reconciled against recorded sales
KRA fiscal integration	Real-time submission of qualifying transactions to KRA, and credit notes generated and submitted from the platform
Tank monitoring and tank sales	Tank stock, variance alerts, and storage-tank sales within shift records
Point of sale	Dry-stock sales, customer management, loyalty and customer wallet
Management reporting	Shift, sales, attendant, product and payment reports, plus audit logs and analytics
Forecourt device integration (Phase 2)	Integration with pump and dispenser communication, tank probes and relevant devices, scoped once the new dispensers are available

The rollout is successful when you can see these outcomes:

Outcome	What you will see
Transaction visibility	Reports by attendant, product and shift are available to station management
Fiscal compliance	Qualifying transactions reach KRA in real time and credit notes can be generated and submitted
Reconciliation	Fuel sales and collections reconcile at shift level and variances are identified from system records
Tank sales	Applicable tank sales are captured and shown in shift reporting
Operational usability	Station staff run the agreed workflows on Octane Obit after training

3. Onboarding approach

Onboarding runs in four phases. With no hardware to fit in this phase, setup is done by configuration and can start as soon as the details below are confirmed.

1. **Site readiness and configuration.**
    - Confirm the station set-up: products, tanks, dispensers, attendants and shifts.
    - Configure attendants, shifts, products and reporting.
    - Set up the KRA integration using the Client's PIN.
2. **Commissioning.**
    - Test transactions, attendant attribution, payment and shift reconciliation, and KRA submissions.
    - Resolve any configuration or integration issues.
3. **Go-live and training.**
    - Train attendants, supervisors and managers.
    - Switch on shift reconciliation and assign a Customer Success contact.
4. **Stabilisation and review.**
    - Daily check-ins for the first two weeks after go-live.
    - Review results against the five outcomes in section 2 and agree any follow-up, including the Phase 2 dispenser integration.

4. Responsibilities and scope

The rollout works when each side does its part.

Summit Surds Limited will:

- Configure the Octane Obit platform and set up users.
- Integrate KRA eTIMS and commission the system.
- Test transactions and integrations.
- Train the Client's designated staff.
- Monitor, support and troubleshoot through go-live and stabilisation.
- Report on performance against the outcomes in section 2.

Fahd Agro Investments Ltd will:

- Give access to the station and its personnel.
- Provide the technical and operational information needed, and its KRA PIN to facilitate eTIMS integration.
- Take part in testing and make sure staff attend training.
- Keep stable power and internet connectivity at the station.
- Give timely feedback on operational issues and keep normal operating procedures in place.

5. Commercials

All amounts are in Kenya Shillings and exclusive of VAT unless stated. You can lease Octane Obit or buy it outright. This offer covers software only; dispensers and other hardware will be quoted separately when the new dispensers are available.

Option A: Lease (minimum 24 months)

Payment plan	Lease per month (KES)
Paid monthly	18,000
Paid every 6 months	15,000
Paid annually	13,000

Option B: One-time purchase

Item	Amount (KES)	Billing
System price (excluding VAT)	300,000	One-time
VAT at 16%	48,000	One-time
Total including VAT	348,000	One-time
Digital Care Support	3,000	Per month

Applies to both options

Item	Amount (KES)	Billing
Onboarding	50,000	One-time
PDQ (POS Device for ETR printing)	48,000	One-time
KRA integration	59,499	Per PIN, per year

Transaction charges. Applied per payment processed through the platform:

Payment method	Charge
Cash transactions and invoice	KES 0.1 % per transaction
Mobile money	0.75% per transaction
Card payments	2.30% per transaction

Note: (All fees are VAT inclusive)

Payment terms.

Onboarding, PDQ and the one-time purchase price are invoiced on signing. Lease payments are invoiced in advance for the plan chosen, and KRA integration annually. VAT at 16% is added to all invoiced amounts that do not already show it.

6. Next steps and acceptance

Once this document is signed, Summit Surds Limited will start KRA integration and system configuration.

1. Fahd Agro Investments Ltd confirms the station name, location and KRA PIN (P052461544V).
2. Both parties sign below.
3. Summit Surds Limited issues the upfront invoice.
4. Configuration and onboarding begin.

By signing, the parties confirm they have reviewed and agreed the scope, responsibilities, outcomes and commercial terms above.
